Introductory

The Publishers herewith present the Eighth Annual Edition of the Saskatoon City Directory. The work has been carried on in the same careful manner by trained and experienced men and we believe we have produced a Directory to the exacting requirements of the business community and the public.

This edition embraces the area of Greater Saskatoon, comprising the territory of the city proper, Nutana, Sutherland, Factoria and all subdivisions and environs.

The advertisement department in the front together with the classified section in the back of this Directory contains an alphabetical list of all articles made and sold in Saskatoon and virtually makes it a catalogue of the city which forms a most complete Buyer's Guide.

Canada with every nation is passing through a time of stress and tribulation in this World's disaster. We are taking part in the greatest war of all history. Our citizens from all parts of the Dominion are on active service fighting the battles of the Empire. The loss of so many men having gone with these contingents together with the great number of British and reserves of all the Allies, have drawn from our cities, and it is quite natural to expect that the Directory would reflect this loss and be smaller on that account and contain less names.

The publishers desire to thank their patrons and the general public for the unfailing courtesy shown their representatives and also would say that they appreciate most thoroughly the confidence and satisfaction which the business men of Saskatoon have always shown in them and their work.

PART I.

City of Saskatoon

No city proposes a more valuable asset than picturesque charm. This, because the beauty of a place goes far to influence its selection by those seeking a new home and sphere of effort. However, as a rule, the newcomer's preconceptions of this West have not prepared him for much that is picturesquely attractive. Consequently, Saskatoon's exquisite natural charm—being unexpected—appeals with added pleasure—a pleasure instantly compensating for the loss of other beauties loved and left behind—for, after all, there are new ones here to replace the old: A magnificent river flowing between wooded banks, winds through the very heart of the city; a city of splendidly broad streets and avenues, of imposing business blocks and public buildings, and of beautiful homes standing in fair gardens. Beyond the city, the prairie, vast and inspiring, stretching away to the vague and dreamlike far-beyond, where the sky seems to rest on the very rim of a beautiful world, with here and there the golden glow of ripening grain; and always a splash of wildflower color on an endless carpet of wondrous greens. Saskatoon is as a beautiful gem in a beautiful setting.

One hundred and thirteen hopeful souls and a few rude shacks huddled together on the bank of the South Saskatchewan River—such was Saskatoon in December, 1903—such was the crude and humble embryo from which the splendid city of today has arisen in those few, short, intervening years.

However, there must be reasons for all things; causes for all effects. The phenomenal growth of any city owes nothing to chance. Let us therefore examine the causes responsible in the case of Saskatoon.

Saskatoon is too young for old inhabitants and consequently escaped the retarding influence of cherished tradition and obsolete precedent.

Further, the pioneers who raised Saskatoon from a shack hamlet were of a singularly fine type—young men, cultured, far-sighted; equipped with infinite resource and inspired with high ideals and the courage to strive for and achieve them—men who above all else grasped the full potency of true citizenship and the irresistable power of unity.

And now briefly examine the more prominent of the material causes contributing to Saskatoon's wondrous unfolding.

Glance at any map: Note Saskatoon's strategic geographical location—far removed from any other large city—right in the middle of the West, and at the same time in the centre of the Province of Saskatchewan.

Saskatoon is the only city in Central Saskatchewan. There being no other large point near, the vast surrounding territory is wholly hers because she has the competitive railway facilities and distributing freight rates to control it absolutely as follows:

On carloads shipped in Saskatoon's wholesale distributing territory extends to about 48,600 square miles, stretching far into Alberta—indeed, to within 82 miles east of Edmonton—and even now embracing over two hundred points on no fewer than 2,225 miles of operating railways—a distance only 27 miles shorter than that from Montreal to Calgary, per C. P. R.

On goods manufactured locally, such as flour, Saskatoon controls a distributing area of about 70,000 square miles, within which there are at present over 290 bright young towns and villages.

Within the past seven years, Saskatoon has expended over $1,500,000 on schools. Neither upon construction nor equipment has money been stinted: Of the four schools last completed, three cost $155,000 each, and the fourth $118,000; while the Mayfair school will involve an expenditure of about $140,000.

The City of Saskatoon favors municipal ownership as far as is at present deemed practicable and judicious, and now controls its water, light, power, street car system, sewerage and hospital.

The splendid facilities now operating to Saskatoon are already more than sufficiently important to win her distinction as a great natural railway centre, and such facilities are, at present, almost entirely confined to the new main lines of the three big companies which pass east and west. These, as will be evident, merely constitute the colossal framework upon which an intricate inter-threading of branch lines radiating north, south and in practically every direction, is now being swiftly and deftly woven.

That a veritable network of lines will, in the near future, spread through this whole vast district is a fact which the construction programmes of the different transportation companies already places beyond uncertainty.

COLLEGIATE INSTITUTE

Victoria Avenue cor. 11th Street, Nutana

The Collegiate Building is one of the finest and most up-to-date school buildings in Western Canada. Situated on the high south bank of the Saskatchewan River, it commands an excellent view of the city, the river, and the surrounding country.

The building covers a ground space of 80 feet by 150 feet. It comprises a basement and three storeys. The basement contains a large gymnasium, 70 feet by 33 feet, with 15 foot ceiling, boiler and fuel rooms, lavatories, and rooms for manual training work and the teaching of domestic science. On the first floor are seven class rooms, library, reading room, teachers' room, and principal's office. On the second floor are six class rooms, three science rooms, and two lavatories. The third floor contains a large assembly hall, with a seating capacity of 500 and a stage 18 by 24 feet; also two dressing rooms, and four rooms which may be used for store rooms or for special classes.

University of Saskatchewan

The University is situated on the east side of the south branch of the Saskatchewan river. Its site comprises 1,333 acres. About 300 acres, with frontage of over half a mile on the river, have been set apart for a campus. A portion of the quarter section south of the campus is devoted to plot work, the land being virgin prairie.

A general plan of the campus, making ample provision for future growth, is being prepared. In the preparation of this plan advantage is being taken of the experience of state universities with problems similar to those of this University. In the erection of buildings it was thought wise to begin with a number of small buildings adequate to present needs, but capable of being adapted to special purposes without serious waste and at small cost when the growth of the University requires greater specialization in buildings.

The College building is about 220 feet long and 52 feet wide with wings of about 111 feet in length and 30 in width. At the rear is a large hall capable of seating between 500 and 600 people. This building will be used for teaching purposes in Arts and Agriculture. It is located in a position convenient to the Agricultural, Engineering, Horticultural and Dairy buildings, the Stock Pavilion and Farm buildings so that in time it may be devoted exclusively to the College of Agriculture. Near it are placed the Residences for students.

The College of Arts and Science offers courses leading to the Bachelor's and Master's degrees in Arts, the Bachelor's and Master's degrees in Science, the Bachelor's degree in Civil Engineering, the Bachelor's degree in Accounting; also courses preparatory to professional courses in Medicine, Pharmacy, Divinity and Teaching. Other courses, not leading to a degree but adapted to the needs and tastes of the student are offered.

In order to obtain a degree a candidate is required to pass the Junior or Senior Matriculation, to attend the classes and pass the examinations prescribed in the Calendar. The course for the Bachelor's degree extends over four years for candidates who have passed the Junior Matriculation.

COLLEGE OF AGRICULTURE

The College of Agriculture is a part of the University and stands in the same relation to the University as does the College of Arts and Science. It has a number of buildings planned and equipped for carrying on its particular work and a staff of its own for the purpose of giving instruction especially in the technical subjects and elementary work in English, Mathematics and the Sciences. Its laboratories and equipment are under certain limitations and restrictions, available to students in the other Colleges of the University for the purpose of scientific research.

The aim of the College is to give the students under its care a good, practical training in the different technical subjects that bear upon the various phases of agriculture, such as animal husbandry, field husbandry, farm mechanics, farm engineering, dairying, horticulture, tree planting and others; to give them a good, liberal education in various other branches such as will enable them to adopt themselves readily, without great loss of time and energy, to new and varied conditions, and to fit them for their duties as good citizens.

The University estate consists of the campus, about 293 acres, and the College Farm, 1,040 acres. The College Farm proper consists of 880 acres.

System of Street Names and Numbering

Streets run east and west, odd numbers on west side.

Avenues run north and south, odd numbers on south side.

The townsite has been laid out allowing 18 streets in Nutana, south of the Saskatchewan River, Eighth to Eighteenth Streets being within the Corporation limits, while First Street to Seventh Street lie south of the southern city limits. First street to Eighteenth Street are in Nutana, Nineteenth Street being the first street on the west side of the River. East of the C. N. R. tracks and west of the river streets are numbered from Nineteenth to Twenty-sixth, west of the C. N. R. tracks in Riverdale streets number north from Eleventh to Thirty-third, the northern city limits.

With the Avenues the C. N. R. tracks are the dividing line. Avenues First, Second, Third, Fourth and Fifth running north and south and paralleling the C. N. R. tracks to the east are arranged numerically from the C. N. R. to the Saskatchewan River. West of the C. N. R. Avenues are arranged alphabetically from Avenue A to Avenue P, the western city limits.

In Nutana the street information is taken east from the Saskatchewan River to eastern city limits. On the Avenues north from 8th Street the southern city limits. The system of house numbering adopted by various cities throughout the continent known as the Decimal or Philadelphia system, viz., an even hundred numbers are allotted to each block, the principal advantage of the system is that the number indicates how many blocks distant it is from any given point on a street or avenue.

On the Avenues, which run north and south, a number is allotted for every 12 feet and on streets running east and west, a number is allotted for every 15 feet.

Note—The arrangement in Street and Avenue Directory is in the following order: Alphabetical Streets and Avenues; Avenues A to Z; Numerical Avenues and Streets.

The arrangement by directions is East, West, South and North.

Where the odd and even numbers on an Avenue or Street are separated, the south side (odd numbers) on Avenues will appear first and the west side (odd numbers) will appear first on Streets.
